# WEATHER OF CONCERN

## Weather of Concern

- The next Pacific storm will impact the interior of Northern California Sunday night and Monday with strong wind and heavy mountain precipitation.

## **Active Weather Warnings, Watches and Advisories by County:**

[http://www.wrh.noaa.gov/sto/brief/wwa\\_bc\\_cal.php](http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php)

# **WEATHER SYNOPSIS BY REGION**

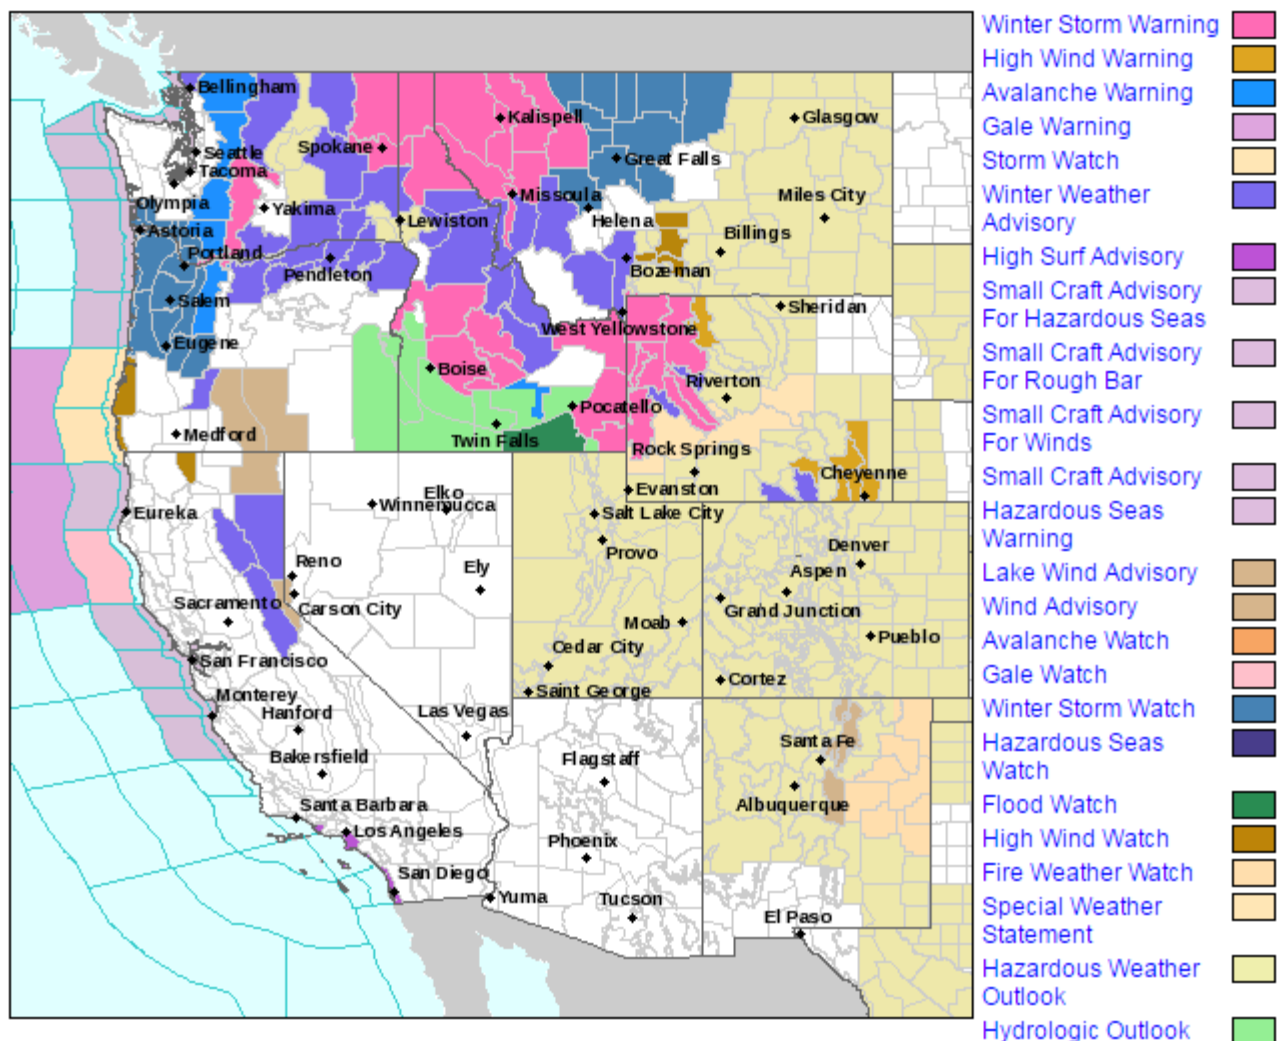

## **NORTHERN CALIFORNIA**

A moist air mass will keep a threat of showers this weekend, mainly over the mountains. Most Central Valley locations will likely see little, if any, rainfall as showers will be scattered today and less likely Sunday. Next Pacific storm impacts the region Sunday night and Monday with strong wind and heavy mountain precipitation. Snow levels will be right around 6000 feet, but under stronger convective showers snow levels may briefly drop to near some valley floors. By Sunday there is a brief break in precipitation before the next storm arrives on Sunday night.

## **SOUTHERN CALIFORNIA**

A weak ridge of high pressure will bring dry conditions and light winds to the region this weekend. Another Pacific storm will bring showers back to Central California tomorrow evening and to Southern California Monday morning. Showers with this storm will continue through Tuesday evening. This second storm looks as though it will bring more rainfall to the region than the first storm, especially across Southern California. South to west winds of 20 to 40 mph with gusts to 60 mph will surface across the wind prone mountain and desert locations tomorrow evening through Tuesday night. The snow level with both storms will be between 7,000 and 8,000 feet. Temperatures will remain near normal through early next week, with mid 40s to mid 50s across the mountains and upper 50s and 60s in the valleys. A ridge of high pressure will build into the region from the Pacific bringing a warming and drying trend Wednesday and Thursday.
